

Bridgit enterprise implementation overview

Align workforce planning across your company

Bridgit's enterprise-wide implementation standardizes your organization's approach to workforce planning across all regions and offices.

KEY BENEFITS

- **Enhanced forecasting:** Make better decisions with data-driven labor forecasting, scenario planning, and skillset matching across your entire organization.
- **Streamlined data management:** Achieve consolidated data integration, with options for standard or custom integrations.
- **Optimized utilization:** Improve utilization rates and the ability to share staffing resources and best practices between offices and divisions.
- **Standardization:** Enjoy a consistent workforce planning experience across all offices, and consolidate vendor management with a single solution.

ENJOY TOP-NOTCH SUPPORT THROUGHOUT YOUR ENTERPRISE JOURNEY

- A dedicated **onboarding manager** and **customer success manager** will guide you every step of the way.
- Benefit from a **customized implementation plan** and a structured onboarding process.
- Participate in yearly executive business reviews, quarterly all-office syncs, and additional strategic meetings (as needed) to ensure **ongoing alignment and collaboration**.
- Access **unlimited, tailored training** for your end-users.

This strategic partnership includes a dedicated account team to deliver a custom deployment that supports your company's unique workflows and tools. We work closely with your team to ensure a smooth rollout, including integrations with your existing tech stack and continuous updates over time.

A CONFIDENT PATH TO IMPLEMENTATION

Our enterprise-wide implementation is executed in four parts, designed to provide a structured and fully supported rollout:

- **Prep phase – Process design:** We identify and collaborate with your steering committee—key stakeholders across your business—to standardize your workforce planning processes, clarify success metrics, define key action items, and set timelines.
- **Phase 1 – Company-wide deployment:** Bridgit is rolled out strategically across regions at a cadence that aligns with your needs. This includes an initial data migration, comprehensive training, and support with internal comms.
- **Phase 2 – Tech stack integration:** Bridgit becomes a fully-integrated solution within your existing technology ecosystem. We provide integrations for over 30 HRIS, CRM, and project management solutions, plus additional support for enterprise-level user access, data lakes/warehouses, CSVs, and any custom integrations.
- **Ongoing:** Updates, feedback and improvements: This phase is driven by your continuous feedback. It includes ongoing optimization and enablement of new product features.

"Bridgit has become the executive team's backbone for managing resources across our entire organization, which is invaluable. It's become an excellent reporting tool for preconstruction and operations."

Matt Walsh, Operations Technology Manager,
Power Construction

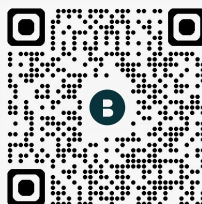

"Bridgit's support team is great. The feedback you get and the two-way communication between the client and product owners is fantastic. It's easy to get going, easy to use, easy to adopt."

Chris Martin, Vice President of Technology
Services, MYCON General Contractors

- ▶ Enterprise-wide implementation is the most effective way for your company to unlock the maximum value from Bridgit's industry-leading workforce planning platform. It ensures consistency, accuracy, and greater efficiency for every team, department, and location, and lays the groundwork for accurate forecasting that your entire org can rely upon for years to come.
